

# GAS ENGINE, V6, WITH TWIN-BODY CARBURETOR

N98-ND5190

This cutaway model is carefully sectioned for training purposes and professionally painted with different colors to better differentiate the various parts, cross-sections, lubricating circuits, fuel system, cooling system, and other key components. The engine operates electrically at 120 volts and runs at a reduced speed to allow students to be able to easily understand and observe the operation of the various mechanical parts. Many parts have been chromium plated and galvanized for a longer life.

## SPECIFICATIONS

- V6
- Displacement: 2,800/3,200cc
- Single overhead camshaft SOHC (1 cam per head)
- Twin body carburetor
- Centrifugal water pump
- 12 volt alternator
- Membrane clutch
- Operates electrically at 120 volts
- Mounted on stand with wheels

## WEIGHT & DIMENSIONS

120cm x 60cm x 100cm (L x W x H)  
 Net Weight: 190 kg  
 Gross Weight: 260 kg

OPERATES  
ELECTRICALLY

MOUNTED ON STAND  
WITH WHEELS
