

ELECTRICAL TRANSPLANTER

N98-ND8390

For the transplant of seedlings of vegetables, flowers, tobacco, nursery plants, etc., having bare or conical roots, pyramidal or cubic peat root ball.

This cut-away is carefully sectioned for training purposes and professionally painted with different colors to differentiate the various parts. Many parts have been chromium plated and galvanized for a longer life. This unit operates at 120 volts by means of a gear motor.
