

Genecon and Static Genecon

I need hand-cranked generator with multiple bulbs, capacitors and other equipment. Can ALL of these things be done with Genecon? What would I need to order?

What you are looking for is one of our Genecon Kit. We have the popular [Genecon Kit](#) which is preconfigured to contain everything you would need to demonstrate each of those principals, or we have a [Custom Genecon Kit](#) which allows you to select the items you find most important.

The Genecon Kit gives you the opportunity to teach important concepts of electricity and comes with the Genecon Manual with many activities such as:

1. [Getting to know your GENECON](#)
2. [Testing Polarity](#)
3. Energy "Loss"
4. Generator or Motor?
5. [Conductor or Insulator](#)
6. Mystery Circuit Boxes
7. Bulbs in Series
8. [Bulbs in Parallel](#)
9. [Variable Resistor](#)
10. [The Thermal Effect](#)
11. Short Circuits and Fuses
12. [Current Detector](#)
13. Magnetism
14. [Electromagnetism](#)
15. Salt Water Electrolyte
16. [Electroplating](#)
17. [Electrolysis of Water](#)
18. [Motor Manipulations](#)
19. [Let's make a motor](#)
20. [The Motor Effect](#)
21. [Energy Storage](#)
22. [An Unexpected Storage Cell!](#)
