

Technology Education Products

Do you no longer make bikes?

We do not offer working rideable motorcycles. What we have are motorcycle cut-aways and motorcycle motor cut-aways. These are meant to be used as training aids when teaching students about the internal components, mechanics and functions of motorcycles.

If you are interested in purchasing one, we are happy to offer you a quote on our products. You may call us toll free at 1-800-799-6232, email us at support@nadascientific.com or send a fax to 518-297-3524.
