

TURBO DIESEL TRUCK ENGINE, INLINE 6, WITH INTERCOOLER

N98-ND6080

This cut-away model has been carefully sectioned for training purposes, professionally painted with different colors to better differentiate the various parts, cross-sections, lubricating circuits, fuel system, cooling system, and other key components. Many parts have been chromium plated and galvanized for a longer life. This engine operates electrically and requires a 120 volt power source. It runs at a reduced speed to allow students to easily understand and observe the operation of the various mechanical parts.
